XGA / WXGA / WUXGA

World first **LCD HLD** projector

High **brightness** and **contrast**

Best picture quality

20000 Hours of real life time

360° projection

Unique 0.29 ultra throw lens with **Zoom** and **Focus** function

Lens shift function

✓ **Note:**

- Before using the product, please read these instructions carefully, and kept safely for future reference.
- OSD options and pictures shown in this document may differ slightly from your product.
- Changes to this manual may be made without notice.

Features and design

Thank you for purchasing the projector. This product is a LCD HLD projector, with ultra short throw lens and new generation light source technology of liquid crystal. high contrast, 5000 lumens,6000 lumens of brightness and up to 20,000 hours of real time, which can keep the brightness diplay throughout the life. Meanwhile, the use of ultra short throw technology can avoid the radiation on the human body and completely eliminate the interference of the shadow on the screen. It is equipped with multimedia feature and use LCD display (LCD) technology with its color depth up to 1.07 billion color. In addition, mute design, the interface location on back of the projector and others make our product with the perfect user experience.

Main features

- 20000H hours of real time with the new light source of HLD+P2W;
- LCD display (LCD) technology: XGA (1024x768),WXGA (1280x800) and WUXGA (1920x1200);
- Unique 0.27 ultra throw lens;
- 360° projection technology;
- Zoom and Focus function;
- Lens shift function;
- Equiped with 10W * 2 speakers;
- Auto setup function;
- Perfect combination of high brightness and color;
- Multi-interface, dual HDMI input;
- Blank design. Tap the button, the projector will switch into blank screen status immediately for prevention of information leakage.
- Various projection mode;
- On and Off instantly;
- 0.5W ultra low power consumption on standby mode;
- Industrial design. ESD filter (static) - double dustproof design and filter check function automatically;
- Logo PIN Code lock and Kensington lock to anti-theft function;
- Closed Caption function;
- Abnormal log management and troubleshooting function;

✓ Note:

- The screen menu and images in the manual may slightly differ from the real product.
- The manual is subject to change without prior notice.

Safety operation guideline

Safety instructions

This document and your projector employ certain symbols to illustrate how to use your projector safely. They are described below: Please get yourself familiar with them before going through this document.

 Caution	Ignoring messages indicated by this symbol may lead to personal injuries or deaths due to human errors.
 Note	Ignoring messages indicated by this symbol may lead to personal injuries or property damage.
	High voltage inside with risks of electric shock.

Please read this manual carefully before installing and operating your projector.

Your projector comes with a lot of convenient features and functions. You may make the most of these features and keep your projector in good working conditions by using it correctly. Invalid operation of your projector may not only shorten its life cycle but also may lead to product failure, fire, or other incidents.

In case of any operation abnormality, refer to this manual to check your operation and connections and try solutions given in the “Troubleshooting” section at end of this manual. If the problem persists, call your dealer or our service center.

 <div style="border: 1px solid black; padding: 5px; text-align: center;"><p>Caution</p><p>Danger of electric shock DO NOT open this.</p></div> 
<p>Note: DO NOT remove the casing (or back cover) as this may result in electric shock. Users shall not execute any maintenance work on components within your projector. Call qualified maintenance personnel in case of any maintenance requirements.</p>

High voltage inside with risks of electric shock.

Operation and maintenance tips about these components.

Safety operation Guideline

Notes

Caution

Safety precautions:

- GROUND your projector.
- Lens of your projector projects strong light. DO NOT look at the light beam directly. You may get your eyesight hurt. This is especially the case with children.
- Unplug the AC power plug if your projector will not be used for long time.
- DO NOT overload the socket of power cord as it may lead to fire or electric shock. DO NOT subject the power cord to any object. DO NOT place your projector in locations where its power cord may become damaged by treading by passersby.
- Disconnect the power plug before cleaning your projector. DO NOT apply liquid or sprays to your projector. DO NOT wipe your projector with wet cloth.
- Please follow warnings and instructions given in labels attached to your projector. Unplug your projector when your projector is exposed to thunderstorm weather, is unmanned, or not in use for long periods to prevent damage caused by lightning and power surges.
- DO NOT use accessories without recommendation by the manufacturer as it may result in potential risks.

Caution

Precautions on air outlet:

- Keep adequate clearance around your projector for its ventilation and cooling. See figure below for the least clearance requirements. The least clearance is a MUST when your projector is placed within a cabinet or other closed environment.

- DO NOT cover the air outlet of your projector. Poor ventilation not only shorten life cycle of your projector but also may lead to risks.
- Slots and openings at rear and bottom of your projector are designed for ventilation. Keep your projector from overheated to ensure its steady operation.
- DO NOT cover the air outlet with cloth or other objects. DO NOT place your projector on the surface of bed, sofa, carpets, or similar object as this may block the air outlets at its bottom.
- DO NOT place your projector in closed environment, e.g. a bookcase, unless it is well ventilated.
- Keep any matter from falling in your projector through the air outlets as they may touch high voltage parts and lead to fire or electric shock by short circuits. DO NOT splash liquid to your projector.

Note:

Precautions on location of your projector:

- Place your projector in a proper location or it may result in fire.
- DO NOT expose your projector in rain or high humidity environments or it may result in fire or electric shock. DO NOT your projector near water or splashing water. DO NOT place any water container, e.g. flower vase, atop your projector.
- DO NOT place your projector in environments of soot, moisture or smoke, e.g. your kitchen, or it may lead to product failure or accidents. Your projector may be damaged by contact with oil or chemicals.
- DO NOT place your projector near exhaust pipe or air conditioning equipment.
- DO NOT place your projector near radiator or heating pipes.
- DO NOT place your projector atop unstable truck, rack, or table. It may fall off the surface and lead to personal injuries and property damages. Please use cart or rack recommended by the manufacturer or included with your product. Please follow steps given in installation guideline included with the wall and ceiling mount racks for installation. Use installation components approved by the manufacturer.
- Be careful when moving your projector with cart. Abrupt stops, pushing too hard and rugged surfaces may topple your projector and the cart together.

FOR EU USERS

The symbol mark and recycling systems described below apply to EU countries and do not apply to countries in other areas of the world.

Your product is designed and manufactured with high quality materials and components which can be recycled and/or reused.

The symbol mark means that electrical and electronic equipment, batteries and accumulators, at their end-of-life, should be disposed of separately from your household waste.

Note:

If a chemical symbol is printed beneath the symbol mark, this chemical symbol means that the battery or accumulator contains a heavy metal at a certain concentration.

This will be indicated as follows: Hg: mercury, Cd: cadmium, Pb: lead In the European

Union there are separate collection systems for used electrical and electronic equipment, batteries and accumulators.

Please, dispose of them correctly at your local community waste collection/recycling centre.

Please help us to conserve the environment we live in!

Caution:

Contains mercury

For more information on safe handling procedures, the measures to be taken in case of accidental breakage and safe disposal options visit: ec.gc.ca/mercure-mercury/

Dispose of or recycle in accordance with applicable laws.

Safety operation Guideline

Note:

Precautions on using your projector:

- DO NOT project the same image for long time as residual images may be left in the panel. This is a property of LCD panel.
- Use power as indicated in tags attached to your projector. If you have doubts over available power type, consult your dealer or local power company first.
- DO NOT open or remove the casing for maintenance as this may lead to electric shock or other damages. Call qualified maintenance personnel in case of any maintenance requirements.
 - In case of the following, unplug the power cord and call qualified maintenance personnel for service immediately:
 - a. Damaged or broken power cord or plug
 - b. Liquid splashed in your projector
 - c. Your projector exposed to rain or water
 - d. If your projector fails to work as expected by following operation instructions, adjust it according to given instructions. Other invalid operations may damage your projector, which requires the technician to spend more time before returning it back to normal.
 - e. The projector falls off to ground or its casing is damaged.
 - f. In case of any abnormal change in your projector during its use, then maintenance services would be required.
- In case components replacement is required, make sure the replacements have been approved by the manufacturer and features the same with the one being replaced. Use of unauthorized parts may lead to fire, electric shock or personal injury.
- After the completion of maintenance or repair work, get the maintenance personnel to run routine safety check to ensure your projector's safety operation status.

Information for users in the European Union

This is a device to project images onto a screen, etc., and is not intended for use as indoor lighting in a domestic environment. Directive 2009/125/EC.

NOTE FOR CUSTOMERS IN THE US

 LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL STATE OR FEDERAL LAWS.

Air ventilation

Openings in the casing are designed for ventilation and overheating prevention. DO NOT block or cover these openings to keep your projector in normal operation and from overheating.

Note:

Heat exhaust at the air outlet Keep the following in mind when using or installing your projector:

- DO NOT place flammable materials or sprayers near your projector.
- Keep the air outlet one meter away from other objects.
- DO NOT touch the area close to the air outlet especially the metal components, e.g. screws. This area and parts will get very hot once your projector starts operating.
- DO NOT place any object atop your projector. They may not only be damaged but also lead to fire after being overheated.

Cooling fans are designed for cooling your projector. Fan speed is auto adjusted subject to internal temperature of your projector.

Air outlet
(For heat exhaust)

Air intake

Place your projector correctly

Use your projector at specified location in correct way. Invalid location may shorten life-cycle of HLD lights or even lead to severe incidents or fire.

- Enable the “Ceiling” function if flip over screen is required. The projector supports

The projector supports 360° projection in Vertical.

Note:

Precautions on ceiling mount racket installation:

- Get qualified technician to install the ceiling mount racket.
- Warranty of your projector does not cover hazards and damage caused by using ceiling mount rackets provided by unauthorized dealers.
- Remove the ceiling mount racket when it is not in use.
- Apply torque driver instead of power driver or impact driver in your projector.

Safety operation Guideline

Moving your projector

When moving your projector, close its adjustment legs as they may damage the lens and casing. Keep your projector in suitable box when it is not to be used for a long time.

Note:

Precautions on moving or shipping your projector:

- DO NOT drop or impact your projector as it may get damaged or failed in operation.
- Please employ proper container for movement.
- Prohibit express or other shipping service provider personnel from shipping your projector with improper boxes. Your projector may become damaged. Please consult your dealers for shipping your projector by express or other shipping service providers.
- Place your projector in box only after it has been fully cooled down.

FCC Caution

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- **Reorient or relocate the receiving antenna.**
- **Increase the separation between the equipment and receiver.**
- **Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.**
- **Consult the dealer or an experienced radio/TV technician for help.**

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

Accessory

Accessory for Citrine XGA /WXGA /WUXGA series as follows:

The projector includes such following accessories. Please check all the packaging. If any items are missing, please contact your dealer immediately.

VGA Cable

Note: The AC Power Cord specification depends on the location of your projector.

AC Power Cord

Remote control(AAA*2)

Name and function of your projector

Front/Top

- ① Focus ring
- ② Zoom ring
- ③ Projection lens
- ④ Air exhaust
- ⑤ LED light indicator
- ⑥ Side control panel
- ⑦ Speaker (*2)

Bottom

- ⑧ Terminal
- ⑨ Remote receiver (back)
- ⑩ Anti-theft lock

Rear

- ⑪ AC Power Cord port
- ⑫ Air exhaust
- ⑬ Air intake
- ⑭ Adjustment pad

Do not place your hands or other objects near the vent:

- Vent will shed heat. Do not put your hands or face, or thermolabile objects placed near the outlet. You need keep at least a distance of 3" (1m) away, or it may cause it burning or damage.

Name and function of your projector

① MONO(L/R) terminal

A mono audio signal (A single audio terminal) should be connected to the mOnO (R / L) interface.

② VIDEO terminal

Connect video output signal to this terminal

③ VIDEO IN1 terminal

Connect output signal from computer to this terminal.

④ VGA IN 2 (YPbPr/S-VIDEO) terminal

Connect the output signal from RGB, YPbPr and S-VIDEO to this terminal.

⑤ VGA OUT terminal

For monitor output, output the signal from ③ or ④ to other monitors

⑥ LAN terminal

Connect mesh cable to this terminal when using network control and operate your projector.

⑦ USB-B connector

When using the "USB display" function, connect your computer to this terminal via the USB cable.

⑧ USB-A connector

When using the Memory Viewer function, insert the USB memory directly to this terminal.

⑨ RS-232C terminal

When using the RS232 functional to operate the projector, connect the serial communication to this terminal.

⑩ AUDIO IN terminal

Connect audio signal of the PC to this terminal.

⑪ AUDIO OUT terminal

Connect external audio devices to this terminal.

⑫ Remote Receiver (rear)

Use the remote control to operate the projector.

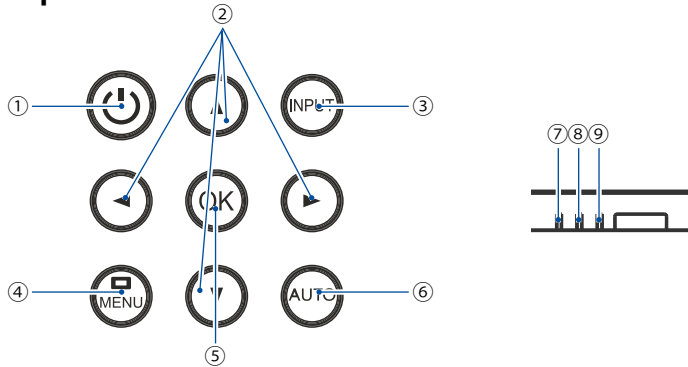

⑬ HDMI 1/HDMI 2(MHL) connector

Connect HDMI1 digital output signals or HDMI 2(MHL) digital output signals to this terminal.

⑭ Anti-theft slot

Use such function to help users to deter theft of the projector.

Side control panel and indicators

① POWER

Open or close the projector.

② Arrow ▲ ▼ ◀ ▶ /UP/DOWN/VOL-/VOL+

- Select items or adjust the data in the OSD menu.
- Adjust the volume.

③ INPUT

Open or close the INPUT menu.

④ MENU

Open or close the OSD menu.

⑤ OK

- Enter the OSD menu
- Select options in the OSD menu .

⑥ AUTO

Perform AUTO Setup, including "Source Search" and "Auto PC Adjust."

⑦ POWER indicator

- The power indicator turns steady red when your projector is in standby mode.
- It turns steady green when your projector is in normal operation.
- It flashes green when your projector is in power control mode(standby) mode.

⑧ STATUS indicator

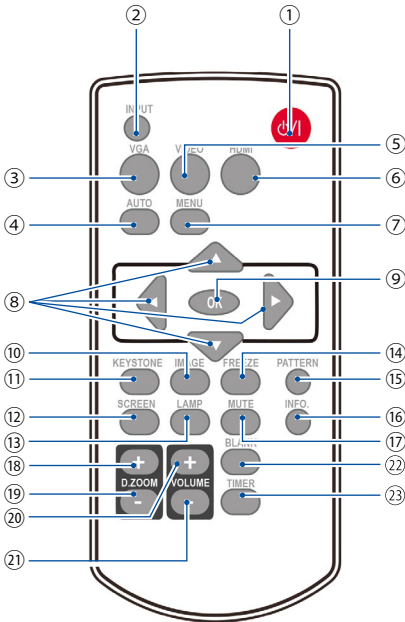

It flashes red when internal temperature of your projector is out of operation range.

⑨ FILTER indicator

It turns red when the filter needs be replaced.

Name and function of your projector

Remote controller

1 **POWER**

Power on or off your projector .

2 **INPUT**

Open or close the INPUT menu .

3 **VGA**

Select VGA/ VGA2/ Component input source.

4 **AUTO**

Enter auto adjustment mode .

5 **VIDEO**

Select VIDEO/ S-VIDEO input source .

6 **HDMI**

Select HDMI 1/HDMI 2(MHL) input source.

7 **MENU**

Open or close the OSD menu .

Zoom in projected image .

19 **D.ZOOM -**

Zoom out projected image .

20 **VOLUME +**

Increase volume.

21 **VOLUME -**

Decrease volume .

22 **BLANK**

Dark out screen images temporarily.

23 **TIMER**

Enable the timer function .

PATTERN button on the remote controller is invalid when you choose USB display, Memory viewer and Network as input signal.

Install battery of remote controller

1 Open the battery cover.

2 Insert a new battery in it.

Two AAA batteries

Place batteries with its anode and cathode (+ and -) in correct direction. Keep both poles in good connection to the contacts within the compartment.

3 Put the cover back.

Please follow the following rules for safety operation:

- Use two of AAA batteries.
- Replace both batteries at the same time.
- Do not mix new and old batteries as one pair.
- Keep your remote controller away from water or other liquids.
- Do not expose your remote controller to environments with high humidity or temperature.
- Do not drop your remote controller.
- In case of any battery solution leaking in the compartment, clear it thoroughly before placing new batteries in it.
- Using battery of other types than what specified on this manual may lead to risks of explosion.
- Please dispose your old battery by following instructions given in tag of the battery or local regulations.

Remote controller operation range

Point your remote controller to the IR receiver of your projector.

Maximum operation range of your remote controller is about arc 15° and with about an area of radius 6 meters or about 8 meters in straight line.

Operation range(Left /Right)

Operation range(Up /Down)

Installation

Project way

The projector supports the following project ways: Front, Rear, Ceiling / Front, Ceiling / Rear, Auto ceiling / Front , Auto ceiling / Rear.

Install the projector according to the installation location. Please turn off the projector when changing the project way. The default projection mode is set to Auto Ceiling / Front, and you can switch to other projection mode from the menu options.

Screen size

- Ambient brightness may affect your projection image quality. For the optimal image effect, it is recommended to control brightness in your environment.
- Values shown in figure below are approximates only. They may differ from the actual ones.
- The further the projector is away from the screen, the larger the projection size will be.
- Use the following table to install the projector in the best position from the screen. The values provided are for reference only.

XGA Series

WXGA/ WUXGA Series

XGA Series

Screen size (WxH)m 4:3 aspect	70"	80"	100"	110"	130"

(**Dedicated cable is available to your dealer .)

Unplug power cords of your projector and all external equipment before connecting any cable to them.

Connect to audio equipment

Cables for connection:

- Audio cable*

(* This cable is not included.)

External audio devices

Unplug power cords of your projector and all external equipment before connecting any cable to them.

Installation

Connect to USB and Wireless card (USB-A and USB-B)

Cables for connection:

- USB-A or USB-B cable*

(* This cable is not included.)

Unplug power cords of your projector and all external equipment before connecting any cable to them.

Connect the AC power cord

Standard voltage employed by your projector is AC 100-240V. It adapts to different input voltage automatically. Your projector employs single-phase power cord with neutral ground cable.

DO NOT use any other type of power cords or you may face the risks of electric shock. In case you have any doubt on type of power cord you are using, please call authorized dealer or service center for help. Before powering on your projector, get all external equipment connected in advance.

Note:

Keep your AC power socket close to your projector for easy plugging and unplugging.

✓ **Note:**

For safety reasons, unplug the AC power cord when your projector is not in use. Your projector will consume a small amount of power when it is connected to AC grid power and in standby mode.

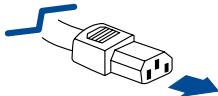

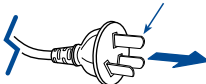

Connect included AC power cord to your projector.

Precautions on power cord

Your AC power cord should meet regulations of the country/district where your projector is used.

Please make sure the type of the power plug is compliant with those given in figure below. Make sure you are using a valid AC power cord.

In case the included AC power cord does not comply with the AC power socket in your location, call your dealer for replacement.

The projector side	Connect to the AC power socket
 <p data-bbox="165 1209 508 1257">Connect to power cord connector of your projector</p>	<p data-bbox="804 1082 947 1104">Grounding end</p>  <p data-bbox="640 1219 911 1241">Connect to AC power socket</p>

✓ **Note:**

- Use of invalid power cord may hamper product performance or even lead to electric shock, fire, and other incidents. Please use power cord compliant with the included one to ensure product performance and operation safety.
- The frequently used cables are: AC power cord, VGA cable, audio cable, video cable, and serial control cable.

Basic operation

Power on your projector

1. Connect all external equipment to your projector (e.g. computer or camera) before powering it on.
2. Connect AC power cord of your projector to an AC power socket. The Power indicator turns on in red.
3. Press the Power button on the top control panel or the remote controller.
The Power indicator lights in green and the cooling fan starts running.
4. If your projector is setting as password protected, the password dialog box displays. Enter your password as instructed below.

✓ **Note:**

- In case the "Logo Select" option is set to OFF, then no welcome image will display in screen.
- You can do nothing but powering off your projector during the welcome image is displaying.

Enter password (PIN)

Press ▲▼ button to select a number, press ► button to enter it and move the cursor. The number you typed is displayed as "*"". To edit number you have entered, press ◀ button to move the cursor to the number you want to change, press ▲▼ button to select the correct one.

Repeat this step to type in a 3-digit number.

Move the cursor to SET after you have typed the 3-digit number. Press the OK button and now you are ready to use your projector.

If the password is invalid, the password displayed as "***" will be in red. Please try again with a valid one.

Move the cursor to Set button, then press the OK button.

What is a password (PIN)?

A password (PIN) is an ID code for identifying people with knowledge about it to operate your projector. A password (PIN) setting may help preventing your projector from unauthorized use.

Your password (PIN) code is a 3-digit number. To find out more about protecting your projector with a password (PIN), please refer to the PIN Code Lock function in the Setup menu on Page 54 for details.

Precautions on password (PIN) operation

You cannot operate a password (PIN) protected projector without correct password (PIN). Please set up a new password (PIN) and keep your operation manual in safe place. In case the password (PIN) is lost or forgotten, call your dealer or service center.

Power off your projector

1. Press the Power button at the side control panel or the remote controller, the “Power off?” message displays.
2. Press the Power button again in 4 seconds after the “Power off?” message prompted to you. The POWER indicator flashes red while the cooling fan continues running. (You may set up noise level and speed of the fan when it is cooling down.) Unplug the power cord until the fan stops running. Failure to do so may shorten life cycle of your projector or lead to power on failures or operation abnormalities.

“Power off?” message disappears in 4 seconds.

To maintain the life cycle of the HLD light, power off your projector after it has been turn on for at least five minutes.

Do not use your projector without stops. As it may hurt the life cycle of your HLD light source. Power off your projector at least once every 24 hours and have it idle for an hour.

✓ **Note:**

- If the “On Start” function is set to “On”, your projector will power on once it is connected to an AC power socket. (Refer to page 46)
- Speed of the cooling fan varies with internal temperature of your projector.
- Do not place your projector in any box before it is fully cooled down.
- In case the POWER indicator flashes or turns red, refer to the “Status light indicator ” for instructions. (Refer to page 82)
- The POWER indicator flashes when the lamp is cooling down. Do not power on your projector at this time. Power on your projector only after the POWER indicator turns red.
- Unplug the power cord after your projector has been turned off. The fan stops running.

Basic operation

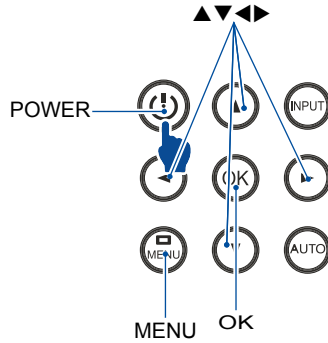

How to operate the OSD

You can adjust or set up the projector on the on-screen menu .

The menu has a multilayer structure. Each main menu is divided into several sub-level menus, then each submenu is divided into several submenus.

Please refer to the appropriate section of this manual for the procedure for the adjustment and settings.

Rear control panel

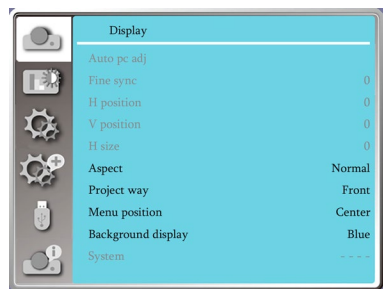

Remote controller

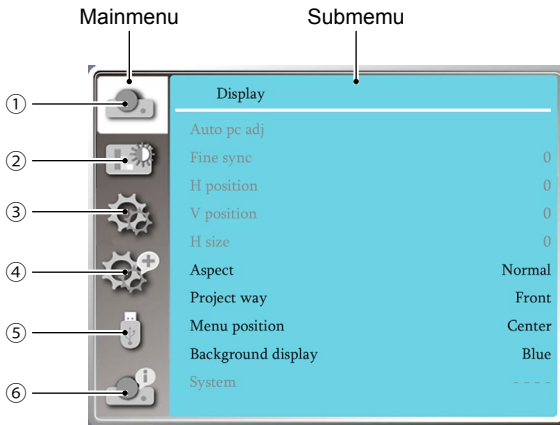

1. Press the MENU button on the side control panel or remote controller and the OSD displays.

 - (4) Press ▲▼ button to set DHCP On and press OK button to confirm.
 - (5) Press ▲▼ button to select Set, press OK button to wait until the “Please wait..” message disappears.

✓ Note:

- If you are using the wireless network connection, please check the SSID / ESSID and wireless IP address in the Network Setting status, and write down the information.

Network control

WI-FI display (For PC.)

Wi-Fi display enable to connect PC with the projector wirelessly to realize high-speed transmission between devices, allowing users to enjoy high-definition video display without the need for cables circumstances.

Wireless network setup

1. Inset the supplied WIFI dongle into the USB-A port.
 - For this fuction,users need to purchase the WIFI dongle seperately with your suppliers.

2. Please find "NetworkDisplay" in the Open Network and Sharing Center and click "Connect" to connect the WIFI.

WI-FI display (For Mobile devices)

Wi-Fi display enable to connect any mobile devices with the projector wirelessly to realize high-speed transmission between devices, allowing users to enjoy high-definition video display without the need for cables circumstances.

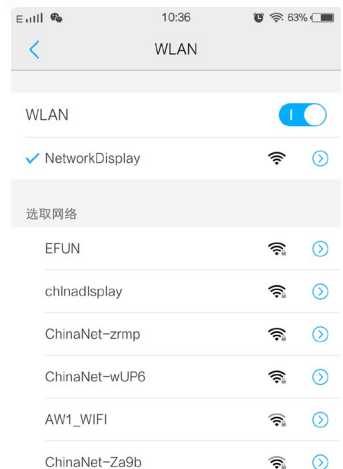

■ Wireless network setup

1. Inset the supplied WIFI dongle into the USB-A port.

- For this fuction, users need to purchase the WIFI dongle seperately with your suppliers.

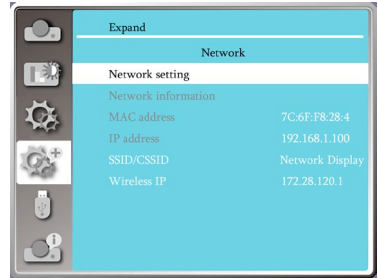

2. Please find "NetworkDisplay" during WLAN in Setting menu and click "Connect" to connect the WIFI.

Network control

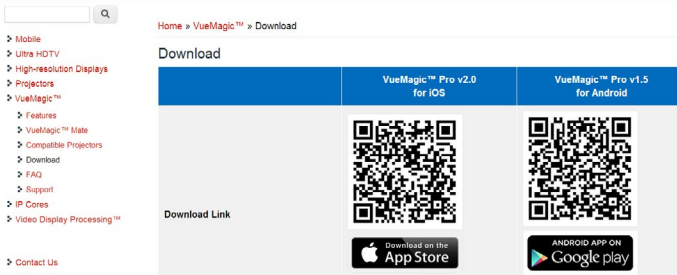

Installation procedure:

1) Type the Wireless address (<https://www.pixelworks.com/?q=node/19>) of the projector in the address bar of the web browser.

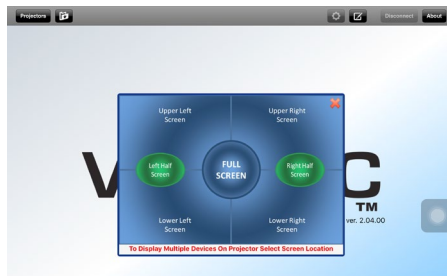

2) Click Download button.

3) VueMagic Software: Choose to download the appropriate VueMagic software system based on the mobile device and install it.

4) Click  icon to enter VueMagic software, then select the appropriate screen display menu location, and click on the top left icon  of the mobile device can be projected image or a file.

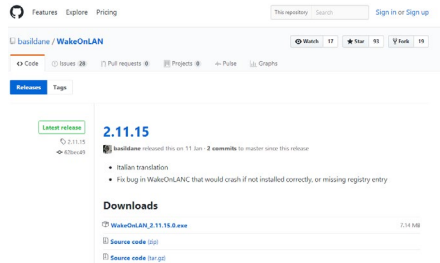

Click to enter to search, select the needed projector and connect it . Set the same IP address (for example: 172.28.120.1) as the projector in VueMagic software .

✓ NOTE

- Before using the pwPresenter search, please switch to the input signal of Network.

Wake On LAN control

- 1) Enter the Wireless address (For example: <https://wol.aquilatech.com/>), then enter to Wake On LAN official website.
 - Users can download the software at any other links.
- 2) Click "Download" button to download Wake On LAN software.

- 3) Click  icon for installation.

✓ **NOTE**

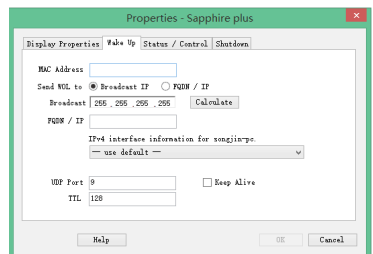

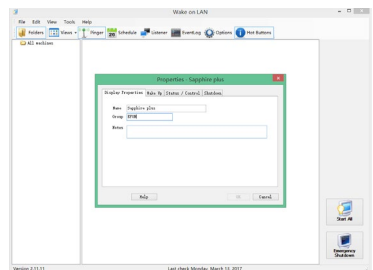

- Please select the wanted language to install.

Wake On LAN

Function: It is used for computer to remote wake-up of the projector.

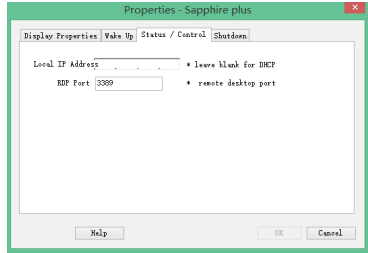

Operation steps

- 1) Start the Wake On LAN software.
- 2) Click the "File" in the menu bar, then enter to the New Host.
- 3) Click the "Display Properties" in the menu bar, then enter the Name, Group and notes. Relevant pages just show as right.
 - Enter the Name and Group as you like. We take the Name of Sapphire plus and Group of EFUN for example
- 4) Click the "Wake Up" in the menu bar, then enter the MAC Address and FQDN / IP. Relevant pages just show as right.
 - For details on how to obtain the MAC Address, please refer to page P63.

Network control

- 5 Click the "Status / Control" in the menu bar, then enter the Local IP Address. Relevant pages just show as right.
 - For details on how to obtain the Local IP Address, please refer to page P63.

- 6 After the above steps are completed, then the group area will generate the corresponding icon. Right click on the icon, then click "wake up" to make waking.

Note:

The downloading links provided in our user's manual is not the only links. Users can download it at anywhere you can.
The Wake On LAN software is not owned by our company.

Memory Viewer function

When the USB memory is inserted into the projector, the viewer memory function can project the video and pictures stored in the USB memory.

■ The projected content of Memory Viewer function

Memory Viewer function supports the following picture files.

Video	Extension name	Video Codec	Audio Codec	Video Format
	avi	MotionJPEG	ADPCM	Maximum 1280x720,30fps

	Extension name	Format	Description
Maps	jpg/jpeg	Baseline encoder 24 Progressive RGB24 bit	Max resolution: 10000x10000 Max resolution: Panel Resolution
	bmp	1,4,8 bit palette-based RGB24,32 bit	Max resolution: 1280x800
	png	24, 48-bit True Color	-24-Bit color palette space Max resolution: 1024x768
	gif	1,4,8-bit palette-based	Max resolution: 800x600
	tiff		Max resolution: 800x600

Display memory viewer screen

When the USB memory is inserted into the projector, the viewer memory function can project the video and pictures stored in the USB memory.

- 1) Press INPUT button on the control panel and on the top control panel and select the input source of [Memory Viewer].
- 2) Insert the USB memory into the <USB (browser) > terminal directly.
 - Press RC enter to display standby screen instantly, while the USB memory icon display in the left corner of the screen.
 - When the USB memory is independent of the partition, it will display more than one USB icon.
- 3) Press ▲▼ button to switch required items.
 - The root directory of the USB memory is displayed in a thumbnail.

Play image

Only one image shows on the screen when you play it.

- 1) Press ◀▶ button to select a file.
- 2) Press <OK or ▶ > button.
 - Full screen display
- 3) Press <OK > button.
 - Press <OK> to return the thumbnail.

Useful function

Play slide

The Slide Show Mode in the Memory Viewer menu is set to a special setting ,all images in the same folder can play automatically.

- 1) Press ◀▶ button to select a file.
- 2) Press ▲▼ button to select [Memory Viewer] menu,then select [From Scratch] menu.
- 3) Press <OK > button.
 - Full screen display
 - Press <OK> button to return the thumbnail.

Play video

Play video files.

- 1) Press ◀▶ button to select a file.
- 2) Press <OK> button.
 - Full screen display
 - Use the remote control to operate the controller that appears at the bottom of the screen.

	Stop playing the video and return to the thumbnail
	Play / pause the video
	Video fast backward / forward
	Video fast backward / forward at the twice speed
	Each time press the icon , the box switches . When the box appears, the video can playback.

The termination of Memory Viewer

The Slide Show Mode in the Memory Viewer menu is set to a special setting ,all images in the same folder can play automatically.

- 1) Press ◀▶ button to select  ,displayed in the left corner of the screen.
- 2) Press <OK > button.
 - Please Press RC ENTER to display standby screen instantly.
- 3) Unplug the USB memory directly.

Caution

- When you insert a USB memory, please make sure insertion direction to avoid damaging the port i.
- Please note the following points when inserting and removing USB memory:
 - a. The indicator flashes, when the USB memory insert into the projector or the projector is reading data. DO NOT remove the USB memory When the light is flashing.

- Resolution of the computer screen will be switched.
- You need wait for a moment,if you want project computer screen.
- Connect the USB cable directly to the computer's USB connector. When connecting the USB hub, it may be abnormal.

The termination of USB display

- Remove the USB cable directly,when terminate USB display.

Maintenance and cleaning

Status light indicator

The status light indicator shows status of projector protection function. Check status and POWER light indicator for good maintenance operation.

Note:

Unplug the AC power cord in case of any abnormality as it may lead to fire or electric shock.

The projector turns off and the status light indicator flashes red.

Your projector powers off automatically to protect components within it when it is overheated. The POWER indicator flashes when your projector is cooling down. Press the STANDBY button to power your projector on again when it is cooled down to normal operation temperature.

FILTER STATUS POWER

The status indicator flashing red

✓ **Note:**

The POWER indicator stops flashing when your projector's internal temperature cooled down to normal and it is powered on again.

Check the following:

- Is adequate clearance provided for your projector's ventilation? Check the installation status and any air outlet block.
- Is your projector installed at location close to outlet of air conditioning equipment? Keep your projector away from air outlet of air conditioning equipment.
- Is the filter in clean condition? Please clean the filter regularly.

Your projector powers off and the status light indicator turns red.

The STATUS indicator turns red and your projector powers off to protect its internal components whenever an abnormality is detected. Unplug the AC power cord and connect again. Restart your projector and run checkup routine. If the problem persists, unplug the AC power cord and call your service center for checkup and maintenance.

FILTER STATUS POWER

The status indicator turns red

Clean the projector when contaminated by foreign matter or its display effects are getting worse.

Note:

Unplug the AC power cord before any cleaning operation.

Clean casing of your projector

Wipe the casing surface with clean and soft cloth. Gently wipe the casing with clean and soft cloth dampened with small amount of neutral detergent to remove heavy dirt. Do not over apply cleaner to the casing. Abrasive cleaner, solution, or other rough chemical may scratch the casing surface.

Place your projector in proper container after use to protect it from dirt and dust and being scratched.

Clear the filter

The filter is designed to keep dust from entering in your projector, which may lead to dusts accumulated on surface of internal components. Clogged filter may reduce cooling fan effects, which, in turn, will overheat your projector and shorten its life cycle. Clean the filter immediately whenever the Filter Warning icon displays.

Please follow these steps to clean your filter:

- 1 Power off your projector and unplug from AC power source.
- 2 Remove the filter.
- 3 Gently clean it with a brush.
- 4 Replace the filter. Make sure it has been fully inserted.

Filter counter

Note:

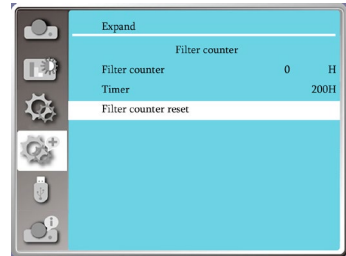

Do not operate your projector after its filter is removed. Dust may attach to the lens assembly and deteriorate image quality.

Do not insert any small object in the air outlet. It may fail your projector.

Maintenance and cleaning

Reset the filter counter

- 1 Press MENU button and the OSD displays. Press ◀▶ button to select Expand menu, press ▶ button or OK.
- 2 Press ▲▼ button to select "Filter Counter", press ▶ button or OK. Press ▲▼ button to select "Reset the filter counter" and press OK. The "Reset filter counter?" message displays. Select Yes to proceed.
- 3 In another pop-up dialog box, select Yes to reset the filter counter.

■ Recommendations

Please do not use your projector at place of dust and smoke. This may affects image quality. Using your projector in place of dust and smoke may lead to piling dusts on lens, LCD panel, and lens components within it. In case like this, call your dealer or service center for correct cleaning.

Note:

Reset the filter counter after its cleaning or replacement.

Troubleshooting

Check the following before calling your dealer or service center:

Troubleshooting	Solution
Power on failure	<ul style="list-style-type: none"> – Plug the power cord of your projector in an AC socket. – Make sure the POWER light indicator turns red. – Restart your projector until the POWER light indicator turns red. It indicates your projector is ready for power on again. – Disable the Key Lock function of your projector.
Logo screen display failure	<ul style="list-style-type: none"> – Make sure the Off and Countdown Off is selected in the Display function.
The Logo screen differs from the standard settings.	<ul style="list-style-type: none"> – Make sure you did not select User or Off in the Logo Screen.
Input signal switch (or do not switch) automatically.	<ul style="list-style-type: none"> – Make sure you have correctly set up the Input Search function.
Press INPUT button during power on and a non-input mode icon displays.	<ul style="list-style-type: none"> – This is a filter or light source replacement alerts.
A non-input or lamp mode icon displays.	<ul style="list-style-type: none"> – This is a filter replacement alerts.
Image looks fuzzy	<ul style="list-style-type: none"> – Adjust focus of your projector. – Provide proper projection distance. – The projection lens requires cleaning. – Moving your projector from a colder environment to a hotter one may result in condensing on the lens. If this is the case, wait until the condensing water evaporated before powering on your projector.
Image mirror reflected Image turns upside down	<ul style="list-style-type: none"> – Check the Ceiling and Rear settings. – Check the Ceiling settings.
Image looks dim	<ul style="list-style-type: none"> – Check for contrast and brightness settings. – Check for correct image mode settings
No image displays	<ul style="list-style-type: none"> – Check for the connection between your projector and computer or image equipment. – Check for correct input signal from computer. Connection with certain notebook computer may mandate changes to its display output settings. See the user manual included with the computer for details on settings. – It takes about 10 seconds for your projector to show the first image. – Check for mode of signal, color system, image system, or computer system. – Make sure the ambient temperature is within given range [0°C–40°C(35-ECO)]. – Image does not display in BLANK mode. The BLANK button or other buttons on the remote controller.

Appendix

Abnormal color	<ul style="list-style-type: none">– Check for mode of signal, color system, image system, or computer system.– Make sure Blackboard mode is not selected in Image Select.
Some operations are invisible	<ul style="list-style-type: none">– Check the display function.
Auto PC Adjusting function failure	<ul style="list-style-type: none">– Check input signal. Auto PC Adjusting function is unavailable in 480p, 576p, 720p, 480i, 576i or 1080i mode.
Settings do not save after power off	<ul style="list-style-type: none">– Make sure you have selected Store after settings adjustment. Certain settings do not keep without selecting Store.
Power management failure	<ul style="list-style-type: none">– In case of Freeze or Blank operation, the power management function does not work.
Auto Setting does not work	<ul style="list-style-type: none">– Make sure it is not set to "Off" in each setup menu.– Make sure "On" is not set in Ceiling function.
Image distorted or disappeared	<ul style="list-style-type: none">– Check and revise the PC Adj. menu or Screen menu.
A password prompt displays after power on	<ul style="list-style-type: none">– You have set up the Logo PIN Code lock function
Remote controller does not work	<ul style="list-style-type: none">– Check the battery.– Make sure there is no obstacles stand in between your projector and the remote controller.– Make sure the remote controller is not too far away from your projector. The maximum operation range is 8m.– Make sure the remote controller and your projector are paired with the same remote control codes.– Disable the key lock of the remote controller in the Setup menu.
Light indicator turns on or flashes	<ul style="list-style-type: none">– Check status of your projector according to the light indicator status.
"X " mark displays	<ul style="list-style-type: none">– Invalid operation, please operate your projector correctly.
Control panel does not function	<ul style="list-style-type: none">– Disable the key lock on control panel function in the Safety option of the Setup menu.
Cannot remove the Logo Select password, Key Lock, and PIN Code lock	<ul style="list-style-type: none">– Please call your dealer or service center.

- Make sure your projector is correctly connected to external equipment.
- Make sure all devices have plugged in an AC power source and have been powered on.
- If your projector fails to project image of the connected computer, restart the computer.

**Note:**

Your projector employs high voltage power for operation. Do not open its casing. If the problem persists, call your dealer or service center. Along with model number of your projector and a description to your problem. You will be advised on getting our services.

Appendix

Light indicator status

Check light indicator to learn status of your projector.

Light indicator			Status of your projector
POWER Green /Red	STATUS	FILTER	
			Your projector is in Off status (without AC power supply).
			Your projector is in standby status. Press Standby button to turn it on.
			Your projector is in normal status.
			It is ready for standby or the lamp is cooling. You may power on your projector only after the lamp is fully cooled and the POWER light indicator stops flashing.
			Your projector is in Ready mode.
			Your projector detects abnormal situation and cannot power on. Unplug the AC power cord and connect it again before powering on your projector. If it powers off again, please unplug the cord and call your dealer or service center for maintenance or inspection. Do not let it continue operating as this may lead to electric shock or fire.
			Your projector detects lamp abnormality and cools down.
			Your projector detects lamp abnormality and switches into standby mode.
			Your projector cannot power on, as its internal temperature is too high. You may power it on after it is fully cooled, temperature backs to normal, and the POWER light indicator turns red.
			You may power is fully cooled with temperature backs to normal.
			The filter requires cleaning

- The aforesaid specification is subject to change without prior notice.
- Liquid crystal panel is made on the basis of high standard, where 99.99% of the pixels are effective. Due to the nature of the liquid crystal panel, a fraction of the pixels (0.01% or less) may be ineffective.

RS232 control mode

Serial connection

1.1 Port setting

Project	Setpoint
Communication method	Asynchronous communication
Communication rate	19200
Length	8-bit
Parity check	NO
Stop position	1
Flow control	NO

1.2 Connection mode

Can only use RS232 serial cross connect PC and projector.

Appendix

2. Basic commands

Distinguish the letter case and enter Each command ends with [CR] (enter) .

Command	Option	Command	Option
C00	POWER ON	C07	Video
C01	POWER OFF(Immediately)	C33	Component
C02	POWER OFF	C34	S-Video
C36	HDMI1	C15	Network
C38	HDMI2 (MHL)	C16	Memory Viewer
C05	VGAIN 1	C17	USB Display
C06	VGAIN 2		

2.1 POWER ON command

Command	"C00" [CR]		
Details	Power ON action. Do nothing,when you are in Power ON state . Send this command can force the end of the countdown in the countdown state.		
Return Value	Receive Successfully	[ACK]	[CR]
	Receive Unsuccessfully	"? "	[CR]

2.2 POWER OFF command (Namely Power Off immediatly)

Command	"C01" [CR]		
Details	Power OFF action. Send this command can force your projector to power off during in power on state.		
Return Value	Receive Successfully	[ACK]	[CR]
	Receive Unsuccessfully	"? "	[CR]

2.3 POWER OFFcommand

Command	"C02" [CR]		
Details	Power OFF action. A "POWER OFF " dialog box pops up when sending the POWER OFF command ,and do once again can force your projector to power off. Send this command can force the end of the countdownthe in the countdown state.		
Return Value	Receive Successfully	[ACK]	[CR]
	Receive Unsuccessfully	" ? "	[CR]

2.4 HDMI 1 command

Command	"C36"[CR]	
Details	Select HDMI Input.	
Return Value	Receive Successfully	[ACK] [CR]
	Receive Unsuccessfully	"? " [CR]

2.5 VGA IN 1 command

Command	"C05" [CR]	
Details	Select VGAIN 1 Input	
Return Value	Receive Successfully	[ACK] [CR]
	Receive Unsuccessfully	"? " [CR]

2.6 VGA IN 2 command

Command	"C06" [CR]	
Details	Select VGAIN 2 Input	
Return Value	Receive Successfully	[ACK] [CR]
	Receive Unsuccessfully	"? " [CR]

2.7 S-Video command

Command	"C34"[CR]	
Details	Select S-Video Input .	
Return Value	Receive Successfully	[ACK] [CR]
	Receive Unsuccessfully	"? " [CR]

2.8 Component command
